

CAST STEEL GATE VALVES CLASS 900

CAST STEEL GATE VALVES HANDWHEEL OR GEAR OPERATED, WITH RISING STEM AND OUT SIDE SCREW AND YOKE (OS&Y)

DESIGN FEATURES

- Gate valves design in accordance with API-600, solid, flexible or parallel slide wedge/Disc.
- Gate valves option in accordance with API-603 only for stainless steel & nickel alloys.
- Gate valves for Cryogenic service with gas column in accordance with BS-6364 upon request.
- Flange dimensions in accordance with ASME B16.5 for valves up to 24" nominal diameter.
- Hand-wheel, impact Hand-wheel, Chain-wheel, Gear operation, Electric, Pneumatic or Hydraulic Actuation as per Customer requirements.
- By-Pass, Lantern rings, grease injectors, special connections, etc.
- · Low fugitive emissions control.
- NACE Service either MR-01-75 or MR-01-03.
- · Test in accordance with API-598.
- · Standard manufacturing flexible wedge from 2" and up
- (1) Stem Nut, replaceable in line to avoid shut down of pipe line process.
- (2) Rising stem with precision ACME single or double thread for quick operation. Surface finish suitable to seal properly to obtain low fugitive emissions.
- (3) Stem Packing is designed for optimum control of fugitive emissions leakage to the atmosphere. The ultra-low emission leakage rate is assured by the polished finish stem sealing area, the reduced diametrical clearances and the stem straightness control special designed packing. Live load packing arrangement available upon request.
- (4) Backseat, either threaded or welded designed to relieve back pressure on the stem packing when fully seated. Replacing stem packing under pressure is not recommended. Hard faced backseat available for severe service as per customer requirements.
- (5) Stem-Gate connection designed so that under severe applied loads (stuck gate), the stem will fail outside of the stuffing box pressure boundary.
- (6) Body to Bonnet ring type joint is designed to apply a uniform load to the gasket to assure a leak proof seal.
- Seat rings are seal welded to provide a bubble tight joint.
- (8) Stellited Seat Rings provide increased resistance to wear, abrasion and erosion of the sealing surfaces.
- (9) Two pieces arrangement gland flange and stem packing bushing for self-alignment to avoid stem damage.
- Gate valves supplied handwheel or gear operated.

CAST STEEL GATE VALVES, CLASS 900 (HANDWHEEL OPERATED)

Design Features

- Design in accordance with API-600
- Outside Screw & Yoke (OS & Y)
- · Flexible Wedge as standard
- Size 2" and 16" supplied with Handwheel as standard
- Flange dimensions as per ASME B16.5
- End to end dimensions as per ASME B16.10
- WE dimensions as per ASME B16.25
- · Stem Nut with Bearing: 4" and larger

| Catalog Figure No. | ID Plant Figure No. | Type of Ends |
|--------------------|---------------------|-------------------------|
| 5247RF | 5247F | Flanged Raised Face |
| 5247RTJ | 5247RJ | Flanged Ring Type Joint |
