## **Design Specifications**

Item	Applicable Specification						
Pressure - temperature ratings	MSS SP-80						
General valve design	MSS SP-80						
Thread design	ASME B1.20.1						
Materials	ASTM						

## **DESIGN FEATURES:**

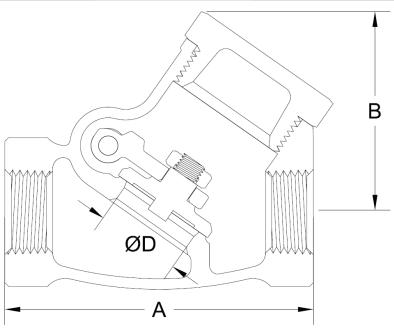

- By unscrewing the side plug and removing the cap and carrier pin, the carrier and disc assembly can be easily removed.
- Renewable disc is held by a locknut.
- Integral seats.
- Valves can be used in a horizontal or vertical position; however, when installed in vertical line, flow must be upward with pressure under the disc.
- Each valve is shell and seat pressure tested per industry standard MSS SP-80.
- Valves are specially cleaned and processed for oxygen or cryogenic service and are then sealed to prevent contamination.
