

# PV5/CMF

ISO conformed valve

## 5 port pilot operated valve

### Overview

PV5 series is 5 port pilot operated valve conformable with ISO standards of valve installation dimensions.

Applicable cylinder bore size up to 160mm.

### Features

#### **ISO standards conformed**

Mounting space, nominal designation of screw thread and flow path dimensions of the valve are conformable with ISO standards.

#### **Energy saving**

Realizes energy saving with low wattage design (1.4W to 2.1W).

#### **Space saving**

38 to 50mm valve wide and compact design. Contributes to downsizing of devices etc.

#### **Easy maintenance**

One plug wiring method and one tough plug-in method between valve and solenoid are provided. Set screws are gathered to the top. Maintenance is easy.

#### **Resource saving**

Special soft packing seal provided. Pre-lubricated.

#### **Long term use available**

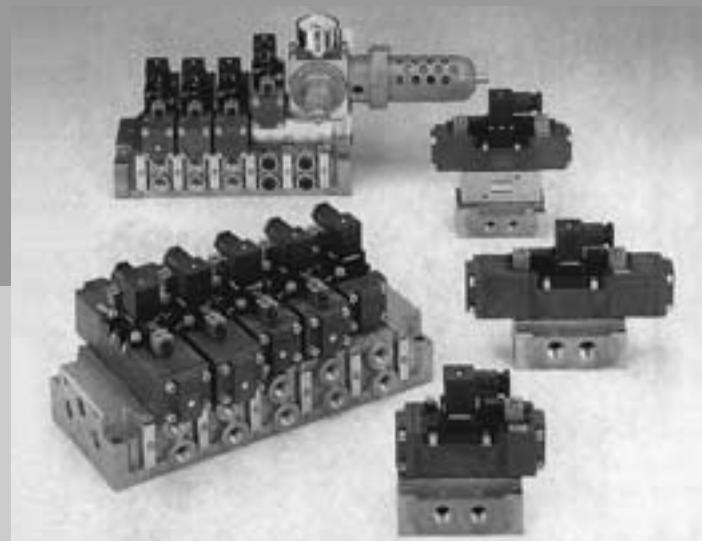

Widely used soft spool method is provided. Long service life.

#### **For two piston cylinder drive**

Exhaust pressurization type is available. Optimum for driving a two piston cylinder for welding machine etc.

#### **Wide variation of options**

Mix manifold of size 1 and 2. For Size 1, a filter, a regulator and an air release valve mounted types are available.

#### ⚠ Caution

#### When installation/adjustment

4SA/B1

**1** Please use the cable conformable with JIS C3312 (600V vinyl insulation vinyl cable), conductor cross-section areas 0.75mm<sup>2</sup> or 1.25mm<sup>2</sup>, and 2/3/4 conductor (O.D.: 8.5 to 11.5 mm).

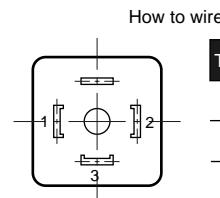

4GA/B

**2** On the end of cable, use crimp terminal to prevent contact defective and coming off.  
(E.g.: 1.25Y-3U/1.25-3.5S/1.25-4M/I.D. M3.5  
O.D. should be within 7mm.)

MN4GA/B

**3** Wrong wiring of terminal may cause malfunction.  
Refer to the following diagram to wire correctly.

4GA/B (master)

Terminal	Wiring position
1	Solenoid a (operation side)
2	Solenoid b (origin side)
3	Common terminal (COM)

When DC, not polarized.
