

Round cylinders DPRA

FESTO

Characteristics

At a glance

- Double- and single-acting versions
- With and without protection against rotation
- With and without cushioning
- Stainless steel piston rod
- Good running performance and long service life
- The variants can be configured according to individual needs using a modular product system

System of units

[N] Imperial

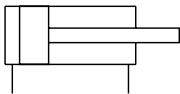

Protection against rotation

[]/[Q] Without/with protection against rotation

- Protection against rotation prevents the piston rod turning during movement
- Application example: position-oriented feeding

Function

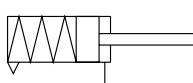

[] Double-acting

- The cylinder has two pneumatic connections which can be pressurized with compressed air one after the other
- When the rear connection is pressurized with compressed air, the cylinder advances. For retraction, the front connection is pressurized with compressed air

Function

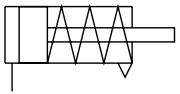

[P] Single-acting, pulling (piston rod advanced by means of spring force)

- The cylinder has one pneumatic connection. The piston rod is advanced in its initial position
- When the connection is pressurized with compressed air, the cylinder retracts. The advancing movement occurs by means of a spring

Function

[S] Single-acting, pushing (piston rod retracted by means of spring force)

- The cylinder has one pneumatic connection. The piston rod is retracted in its initial position
- When the connection is pressurized with compressed air, the cylinder advances. The retracting movement occurs by means of a spring

Piston rod type

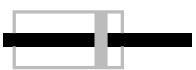

[] At one end

- The piston rod can be used for connection at one end of the cylinder

Piston rod type

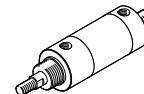

[T] Through piston rod

- The piston rod can be used for connection at both ends of the cylinder
- Identical forces in forward and return stroke

Type of bearing cap

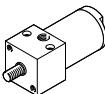

[] With mounting thread

- Including mounting nut when combined with end cap type [NG] Without mounting thread

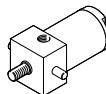

Type of bearing cap

[B] For direct mounting

Type of bearing cap

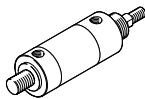

[M] With trunnion flange

Characteristics

Type of end cap

[] Standard

- Including mounting nut

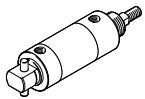

Type of end cap

[U] With swiveling rod eye

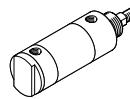

Type of end cap

[ME] With trunnion flange

Type of end cap

[NG] Without mounting thread

Type of end cap

[UB] With swiveling rod eye and bearing sleeve

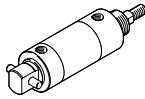

Type of end cap

[U90] With swiveling rod eye, rotated 90°

Type of end cap

[ME90] Trunnion flange, rotated 90°

Compressed air supply port

[] Lateral

- The compressed air supply ports are located on the side of the cylinder

Compressed air supply port

[P4] Axial

- The front compressed air supply port is located on the side of the cylinder and the rear compressed air supply port is located axially on the cylinder
- Only selectable with end cap type [NG] Without mounting thread

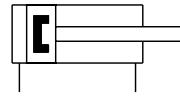

Cushioning

[N]/[P] No cushioning/flexible cushioning rings/pads
At both ends

- The flexible cushioning rings/pads on the actuator allow a greater amount of impact energy to be absorbed in the end positions
- No adjustment required
- Time-saving

Position sensing

[]/[A] Without/for proximity switch

Corrosion protection

[] Standard

- Protects the actuator against corrosion

Temperature range

[] Standard

- The cylinder is intended for use in a temperature range of -5 ... +165 °F

Temperature range

[T4] +32 ... +300 °F

- The cylinder is intended for use in a temperature range of +32 ... +300 °F

Piston rod extension

[]/[...NE] Without/0 ... 6 inch

- The piston rod can be extended by 0 ... 6 inch

Piston rod thread extension

[]/[...NL] Without/0 ... 6 inch

- The piston rod thread can be extended by 0 ... 6 inch

General technical data

Piston diameter	3/4	1 1/16	1 1/4	1 1/2	1 3/4	2	2 1/2
Design	Piston						
	Piston rod						
	Cylinder barrel						
Mode of operation	Double-acting						
Pneumatic connection	1/8 NPT				1/4 NPT		
Piston rod thread	1/8-24 UNF-2A		7/16-20 UNF-2A			1/2-20 UNF-2A	
Stroke [in]	0.0625 ... 12						
Cushioning							
[N]	No cushioning						
[P]	Flexible cushioning rings/pads at both ends						
Position sensing	For proximity switch						
Type of mounting	With lock nut				-		
	With accessories						
Mounting position	Any						

Operating and environmental conditions

Piston diameter	3/4	1 1/16	1 1/4	1 1/2	1 3/4	2	2 1/2
Operating pressure [psi]	10 ... 150						
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]						
Information on operating and pilot media	Lubricated operation possible (in which case lubricated operation will always be required)						
Ambient temperature ¹⁾ [°F]	-5 ... +300						
Corrosion resistance class CRC ²⁾	1						

1) Note operating range of proximity switches

2) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor application and protection during transport and storage. Also applies to parts behind coverings, in the non-visible interior area, or parts that are covered in the application (e.g. actuator trunnions).

Forces [lbs] at 80 psi

Piston diameter	3/4	1 1/16	1 1/4	1 1/2	1 3/4	2	2 1/2
Theoretical force, advancing	35.3	70.9	98.2	141.4	192.4	251.3	392.7
Theoretical force, retracting	31.4	64.8	86.1	129.3	176.7	226.8	368.2

Data sheet

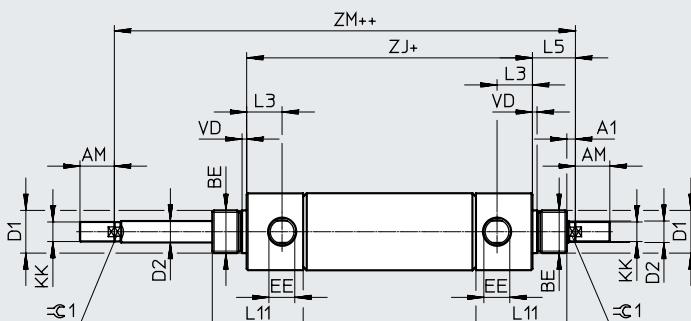

Weights [lb]						
Piston diameter	3/4	1 1/16	1 1/4	1 1/2	1 3/4	2

General technical data

Piston diameter	3/4	1 1/16	1 1/4	1 1/2	1 3/4	2
Design	Piston					
	Piston rod					
	Cylinder barrel					
Mode of operation						
[S]	Single-acting, pushing (piston rod retracted by means of spring force)					
[P]	Single-acting, pulling (piston rod advanced by means of spring force)					
Protection against rotation/guide	Hexagonal piston rod					
Pneumatic connection	1/8 NPT				1/4 NPT	
Piston rod thread	1/8-24 UNF-2A	7/16-20 UNF-2A			1/2-20 UNF-2A	
Stroke [in]	0.0625 ... 6				0.0625 ... 4	
Cushioning						
[N]	No cushioning					
[P]	Flexible cushioning rings/pads at both ends					
Position sensing	For proximity switch					
Type of mounting	With lock nut				-	
	With accessories					
Mounting position	Any					

Operating and environmental conditions

Piston diameter	3/4	1 1/16	1 1/4	1 1/2	1 3/4	2
Operating pressure [psi]	10 ... 150					
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]					
Information on operating and pilot media	Lubricated operation possible (in which case lubricated operation will always be required)					
Ambient temperature ¹⁾ [°F]	-5 ... +300					
Corrosion resistance class CRC ²⁾	1					

1) Note operating range of proximity switches

2) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry indoor application and protection during transport and storage. Also applies to parts behind coverings, in the non-visible interior area, or parts that are covered in the application (e.g. actuator trunnions).

Data sheet

Forces [lbs] at 80 psi¹⁾						
Piston diameter	3/4	1 1/16	1 1/4	1 1/2	1 3/4	2
[P] Single-acting, pulling (spring extend)						
Start of stroke	[in]	28,4	61,8	78,6	122,3	165,7
End of stroke	[in]	25,4	58,8	71,1	115,3	152,7
[S] Single-acting, pushing (spring retract)						
Start of stroke	[in]	32,3	67,9	90,7	134,4	181,4
End of stroke	[in]	31,4	64,8	86,1	129,3	176,7

1) The theoretical forces only apply to whole strokes (stroke 1, 2, 3, 4, 5 and 6).

With intermediate strokes, the force at the start of the stroke is reduced due to higher spring preload. At the end of the stroke, the force corresponds to that of whole strokes.

Weights [lb]						
Piston diameter	3/4	1 1/16	1 1/4	1 1/2	1 3/4	2
Product weight	0.1 ... 0.85	0.22 ... 1.32	0.39 ... 2.42	0.44 ... 2.73	0.85 ... 3.03	1.04 ... 4.04

Materials						
Piston diameter	3/4	1 1/16	1 1/4	1 1/2	1 3/4	2
Cap material	Wrought aluminum alloy					
Material of seals	FPM					
	NBR					
Material of piston rod	High-alloy stainless steel					
Material of cylinder barrel	High-alloy stainless steel					
Note on materials	Contain paint-wetting impairment substances RoHS-compliant

Accessories

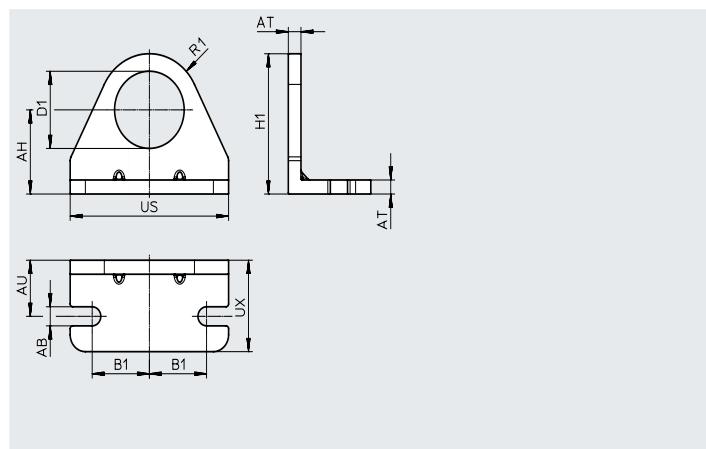

Foot mounting DAMH-C6

Material:

Mounting: steel (galvanized or nickel-plated)

RoHS-compliant

Contains paint-wetting impairment substances
